

The screenshot displays the Ivalua Settings application. On the left is a dark sidebar menu with options: Startpage, Evaluations, Reports, Data pool, Templates, Master Data, Administration, Divisions, Settings (highlighted), Users, and Help entries. The main area is titled "Settings" and contains several sections:

- Title:** A text field containing "IVA Demo-System".
- Support:** Fields for Phone ("0800 4820482") and E-mail ("support@ivaluate.de").
- Logo for application and reports:** Two dashed boxes with icons and the instruction "Drag & Drop oder Datei auswählen".
- Main Color:** A color selection bar showing black as the chosen color, with four small color swatches below it (black, grey, blue, light grey). The first swatch has a checkmark.
- Accent color:** A color selection bar showing orange as the chosen color, with four small color swatches below it (red, orange, blue, green). The second swatch has a checkmark.
- Advanced settings:** A section with a label "Base URL for relative links in help entries:" followed by a text input field containing "https://manual.ivaluate.de/".

On the right side, there is a "Preview" window showing a mockup of the application's user interface. It features a dark header with the Ivalua logo, a navigation bar with "Text" items, and a main content area with a "Checkbox" and a "Umschalter" (toggle switch).

Now you can change the title of the application and the logo under "Logo & Tiel". Under "Support" you can optionally store your own support phone number and e-mail address for your planners & testers.
