

2.1. Overview "Booking calendar" for testers

This is the booking calendar view for the tester.

DAILY VIEW

As a tester, you can see your own **booked**, **requested**, **approved** and **unavailable** drives and the purpose of the drive. The days on which the test object booking was made, requested or approved and the dates of when the test object is not available are also displayed.

QUARTER-HOURLY VIEW

The column for each day is wider here than in the "Daily view". It is possible to book a test object for a day in a quarter-hourly cycle.

The status of the drive remains the same as described above.
