

Activating the "Tester can change reviewer" feature

Activate the checkbox for "Tester can change reviewer" in a test or evaluation if you want to use this function.

This makes it possible for testers to select another tester from a list and assign free feedback to them, without them having to be logged in themselves. This is useful, for example, if several testers share an iPhone/iPad for joint assessment.

The screenshot shows the 'Edit Evaluation' dialog for 'Benchmarking Tests'. The 'Basic data' tab is active, displaying fields for Title, Status, Info text, Start/End dates, and two checkboxes: 'Tester can change reviewer' (highlighted with a red box) and 'Tester may create tests from template (AdHoc tests)'. The dialog includes 'Archive', 'Cancel', and 'Save' buttons. The background shows the Teamware interface with a sidebar menu and a top navigation bar.
