

# Feedback validation

The screenshot shows the 'Create Test' dialog in the Teamware application. The dialog is open over the 'Evaluations' section. It features a sidebar on the left with navigation options: Startpage, Evaluations, Reports, Data pool, Templates, Master Data, and Administration. The main content area is titled 'Create Test' and has tabs for 'Basic data', 'Test objects', 'Tester', 'Instructions', 'Feedback', and 'Questionnaires'. The 'Basic data' tab is active, displaying the following fields and options:

- Title \***: A text input field.
- Status**: A dropdown menu currently showing 'ENTWURF'.
- Info text**: A large text area for additional information.
- Start \***: A date and time picker.
- Time**: A time input field.
- End \***: A date and time picker.
- Time**: A time input field.
- Tester can change reviewer**: A checked checkbox.
- Use feedback validation**: An unchecked checkbox.
- File upload**: A dashed box with a file icon and the text 'Drag and drop PDF, PNG or JPG file here or click to'.

At the bottom right of the dialog are 'Cancel' and 'Save' buttons. The background interface shows the 'Evaluations' section with a breadcrumb 'Evaluations > Vergleich E-Fahrzeuge' and a top bar indicating the user is logged in as 'Max Muster'.

If you want to activate the feedback validation, first navigate to the corresponding test. There you can set the checkmark on 'Use feedback validation' in the Edit mode. You then have the option of setting the status of the test to MEETING BREAK whenever you like. During this time, you can then review the free feedback received and mark it as validated if necessary. This will indicate to future testers that you do not need to report this specific item again.
