

# Feedback validation

The screenshot shows the 'Create Test' modal in the Teamware application. The modal is titled 'Create Test' and has a close button (X) in the top right corner. It is divided into several tabs: 'Basic data', 'Test objects', 'Tester', 'Instructions', 'Feedback', and 'Questionnaires'. The 'Basic data' tab is currently selected. Inside this tab, there are three radio buttons for test types: 'Closed test' (selected), 'Internal test', and 'Public test'. Below these are input fields for 'Title \*', 'Info text', 'Start \*' (with a calendar icon), 'Time', 'End \*' (with a calendar icon), and 'Time'. There are also two checkboxes: 'Tester can change reviewer' (checked) and 'Use feedback validation' (unchecked). At the bottom, there is a file upload area with a dashed border and a file icon, with the text 'Drag and drop PDF, PNG or JPG file here or click to' below it. The modal has 'Cancel' and 'Save' buttons at the bottom right. The background shows the application interface with a sidebar on the left containing 'Startpage', 'Evaluations', 'Reports', 'Data pool', 'Templates', 'Master Data', and 'Administration'. The top bar shows 'Standard' and 'Logged in as: Max Muster'.

If you want to activate the feedback validation, first navigate to the corresponding test. There you can set the checkmark on 'Use feedback validation' in the Edit mode. You then have the option of setting the status of the test to MEETING BREAK whenever you like. During this time, you can then review the free feedback received and mark it as validated if necessary. This will indicate to future testers that you do not need to report this specific item again.
