

Feedback validation

The screenshot shows the 'Create Test' dialog in the Teamware application. The dialog is open over the 'Evaluations' section. It has tabs for 'Basic data', 'Test objects', 'Tester', 'Instructions', 'Feedback', and 'Questionnaires'. The 'Basic data' tab is active. It contains the following fields and options:

- Title ***: A text input field.
- Status**: A dropdown menu showing 'ENTWURF'.
- Info text**: A large text area.
- Start ***: A date and time picker.
- Time**: A time input field.
- End ***: A date and time picker.
- Time**: A time input field.
- Tester can change reviewer**: A checked checkbox.
- Use feedback validation**: An unchecked checkbox.
- File upload**: A dashed border box with a file icon and the text 'Drag and drop PDF, PNG or JPG file here or click to'.

The background shows the Teamware interface with a sidebar containing 'Startpage', 'Evaluations', 'Reports', 'Data pool', 'Templates', 'Master Data', and 'Administration'. The top bar shows 'Standard', 'Logged in as: Max Muster', and a 'Create Test' button.

If you want to activate the feedback validation, first navigate to the corresponding test. There you can set the checkmark on 'Use feedback validation' in the Edit mode. You then have the option of setting the status of the test to MEETING BREAK whenever you like. During this time, you can then review the free feedback received and mark it as validated if necessary. This will indicate to future testers that you do not need to report this specific item again.
