

Status of a test

The screenshot shows the 'Test Hilfesystem' page in the Teamware Iva interface. The top navigation bar includes 'Evaluations > Vergleich E-Fahrzeuge > Test Hilfesystem'. The main content area has a 'Status of Test' section with a 'Draft' button and a 'Change status to' dropdown menu with options: 'Publish', 'Stopped', 'Meeting break', and 'Complete'. Below this is a horizontal tab bar with 'Basic data' selected. The 'Basic data' tab shows test details: 'Type' (Closed test), 'Start' (19.02.2021), 'End' (15.03.2021), 'Use feedback validation' (checked), and 'Tester can change reviewer' (checked). To the right, there is a 'App link / QR code' section with a QR code and a 'Download QR code' button, and a 'Link to Web-App' section with a button 'Open web application for Testers' and a URL: 'https://app-iva-demo.tw.de/tests/8439a65f-5bba-4ce0-bb50-5f'. The bottom of the page has an 'Attached files' section.

You can change the status of a test if necessary by navigating to the test detail page. There you will see the current status of the test halfway up on the left. To the right, you will find a series of buttons that allow you to change the status of the test. Below is a brief explanation of each status.

PUBLISHED: This means that a test is live and testers can participate in it.

STOPPED: Testers can no longer participate in the test, but the status can be changed back to **RELEASED** at any time.

MEETING BREAK: Select this option if you have chosen an iterative approach and want to conduct a discussion of the results during the discussion break. No further participation by testers is possible during this time.

COMPLETE: If all testers have participated and you want to close the test, activate this status
