

Status of a test

The screenshot shows the 'Test Hilfesystem' page in the Teamware Iva interface. The top navigation bar includes 'Evaluations > Vergleich E-Fahrzeuge > Test Hilfesystem'. The main content area has a 'Test Hilfesystem' header with 'Start 19.02.2021' and 'End 15.03.2021'. Below this is a 'Status of Test' section with buttons: 'Draft' (highlighted), 'Change status to', 'Publish', 'Stopped', 'Meeting break', and 'Complete'. A horizontal tab bar below contains: 'Basic data' (selected), 'Test objects', 'Tester', 'Instructions', 'Feedback', 'Questionnaires', 'Results instructions', 'Feedback results', and 'Questionnaires'. The 'Basic data' tab shows test details: 'Type: Closed test', 'Start: 19.02.2021', 'End: 15.03.2021', 'Use feedback validation: ☒', and 'Tester can change reviewer: ☒'. To the right, there's an 'App link / QR code' section with a QR code and a 'Download QR code' button, and a 'Link to Web-App' section with a button 'Open web application for Testers' and a URL: 'https://app-iva-demo.tw.de/tests/8439a65f-5bba-4ce0-bb50-5f'. An 'Attached files' section is at the bottom.

You can change the status of a test if necessary by navigating to the test detail page. There you will see the current status of the test halfway up on the left. To the right, you will find a series of buttons that allow you to change the status of the test. Below is a brief explanation of each status.

PUBLISHED: This means that a test is live and testers can participate in it.

STOPPED: Testers can no longer participate in the test, but the status can be changed back to **RELEASED** at any time.

MEETING BREAK: Select this option if you have chosen an iterative approach and want to conduct a discussion of the results during the discussion break. No further participation by testers is possible during this time.

COMPLETE: If all testers have participated and you want to close the test, activate this status
