

Status of a test

The screenshot displays the 'Test Hilfesystem' page in the Teamware application. The page is titled 'Evaluations > Vergleich E-Fahrzeuge > Test Hilfesystem'. The current status is 'Draft', and the test is scheduled to start on 19.02.2021 and end on 15.03.2021. The status bar includes buttons for 'Draft', 'Publish', 'Stopped', 'Meeting break', and 'Complete'. Below the status bar, there are tabs for 'Basic data', 'Test objects', 'Tester', 'Instructions', 'Feedback', 'Questionnaires', 'Results instructions', 'Feedback results', and 'Questionnaires'. The 'Basic data' tab is active, showing test details such as 'Type: Closed test', 'Start: 19.02.2021', 'End: 15.03.2021', and checkboxes for 'Use feedback validation' and 'Tester can change reviewer'. There is also a section for 'App link / QR code' with a QR code and a 'Download QR code' button, and a 'Link to Web-App' section with a button 'Open web application for Testers' and a URL.

You can change the status of a test if necessary by navigating to the test detail page. There you will see the current status of the test halfway up on the left. To the right, you will find a series of buttons that allow you to change the status of the test. Below is a brief explanation of each status.

PUBLISHED: This means that a test is live and testers can participate in it.

STOPPED: Testers can no longer participate in the test, but the status can be changed back to **RELEASED** at any time.

MEETING BREAK: Select this option if you have chosen an iterative approach and want to conduct a discussion of the results during the discussion break. No further participation by testers is possible during this time.

COMPLETE: If all testers have participated and you want to close the test, activate this status
