

What is an evaluation?

The screenshot shows the 'Evaluations' section of a Teamware application. The left sidebar contains navigation links: Startpage, Evaluations (highlighted), Reports, Data pool, Templates, Master Data, and Administration. The main content area has a search bar, a 'Create Evaluation' button, and a table of evaluations. The table has columns for Title, Status, Start, End, Tester, Tests, Test objects, and Actions. One evaluation is listed: 'Vergleich E-Fahrzeuge' with a status of 'Published', start time of '11/17/20 12:00 am', end time of '11/24/20 08:00 am', 4 testers, 2 tests, and 2 test objects.

Title	Status	Start	End	Tester	Tests	Test objects	Actions
Vergleich E-Fahrzeuge	Published	11/17/20 12:00 am	11/24/20 08:00 am	4	2	2	

An evaluation can be viewed as a collection of tests and itself contains only a limited amount of data such as a name, start and end, etc. In addition, templates for testers, test objects and categories can optionally be entered, which can then be used in a test. This saves you double work if the tests are structured similarly/identically. The status of an evaluation is automatically determined and displayed based on the status of the tests.
