

What is an evaluation?

The screenshot displays the 'Evaluations' section of a software interface. It features a sidebar with navigation options: Startpage, Evaluations (highlighted), Reports, Data pool, Templates, Master Data, and Administration. The main content area shows a table of evaluations. The table has columns for Title, Status, Start, End, Tester, Tests, Test objects, and Actions. A single evaluation is listed with the title 'Vergleich E-Fahrzeuge', status 'Published', start time '11/17/20 12:00 am', end time '11/24/20 08:00 am', 4 testers, 2 tests, and 2 test objects. The interface also includes a search bar, filters for 'Start: All' and 'End: All', a 'Create Evaluation' button, and a 'Pro page: 25' dropdown.

Title	Status	Start ↓	End	Tester	Tests	Test objects	Actions
Vergleich E-Fahrzeuge	Published	11/17/20 12:00 am	11/24/20 08:00 am	4	2	2	👁

An evaluation can be viewed as a collection of tests and itself contains only a limited amount of data such as a name, start and end, etc. In addition, templates for testers, test objects and categories can optionally be entered, which can then be used in a test. This saves you double work if the tests are structured similarly/identically. The status of an evaluation is automatically determined and displayed based on the status of the tests.
