

Version 1.2.0

- Rework of the feedback categories
- Feedback status „draft“
- Feedback status „completed“

Rework of the feedback

You are given a better and reworked visual display of the feedback categories in form of a list.

With the help of a search bar, you can now search this list for specific categories and sub-categories.

Feedback status „draft“

From now on you can save newly created feedbacks as drafts. On your iOS devices you can filter your drafts with the help of the tab-bar. All feedbacks with the “draft” status are synchronized with the IVA planner web application but can only be edited from yourself on your iOS device.

Feedback status
„completed“

FEEDBACK BESCHREIBEN:

Der Motor macht komische Geräusche bei einer Geschwindigkeit von 120 km. Die Geräusche gehen sofort weg, sobald die Geschwindigkeit reduziert wird.

 Georg Smith I/EG - 15

From now on you can complete your feedbacks and send them to the planer web application for review and evaluation. After completing your feedback, you can't edit this feedback anymore.

On your iOS devices you can filter your completed feedbacks with the help of the tab-bar.
