1.0 Presentation of the questionnaire series

Once the questionnaire series have been introduced in the IVA Planner, they can also be viewed and answered in the app. There is no differentiation between the question catalogue and question catalogue series in the view.

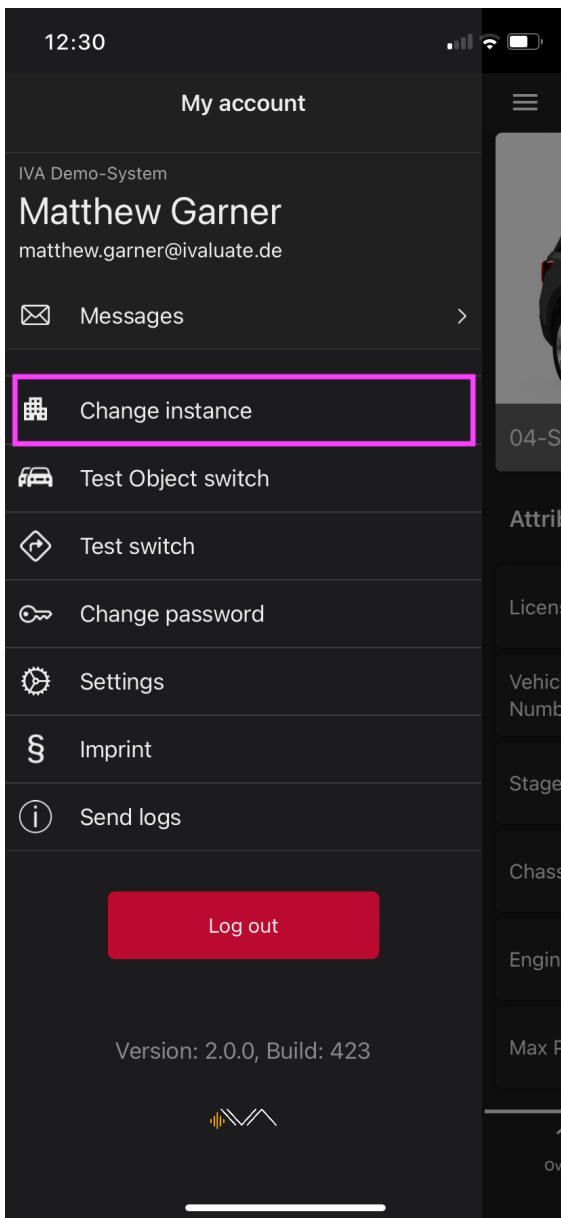

2.0 Change of instance

Overview of the instances

A quick instance change has been made possible in the app. This means that a user can be logged in to multiple instances. If the login was successful in the app, a new login is no longer necessary.

Changes to the burger menu

A new menu item "Change instance" has been added to the burger menu.

In addition, the name of the instance is located above the user name.

Detailed description is here: [LINK to the manual](#).

3.0 Making questions in questionnaires more visible

UI revision: line adjustment

In dark mode, the questions were emphasised by a thicker dividing line.

Seite 2 Question 5 - 9

Are you able to start the vehicle without any complications? If no, please describe the occurring complications in detail.
(mandatory)

Are the vehicle's windows visibly foggy or frozen at the beginning of the test drive?
(mandatory)

☒ Yes

☐ No

Please press the Defog/Defrost button.

Please turn off the Recirculation if it's activated.

Please set the fan and the temperature to the highest setting and activate the A/C if you're defogging.

UI revision: reference to unanswered questions

The handling of the questionnaires has been improved.

When changing pages and not all questions have been read, a message appears.

A question catalogue contains several pages with many questions. The viewing area in a device often only shows part of the questions. To minimise the risk that not all questions have been read when changing pages, a note has been added.

You can now answer the questionnaires multiple times. The number of answered question catalogues can be seen in the overview of questionnaires in the tile of a specific questionnaire.

Selected alternative assessor is also used in other response types.

Once an alternative assessor has been selected in the feedback, it is adopted as a user in the questionnaires.

5.0 BUGs

Rating legend is displayed (for read-only feedbacks)

App crash prevented when editing a feedback

Voice recording works when CarPlay is connected

iOS app: "Not rateable" toggle no longer covered by text field
