1.0 Getting Started with the iOS App Using a QR Code

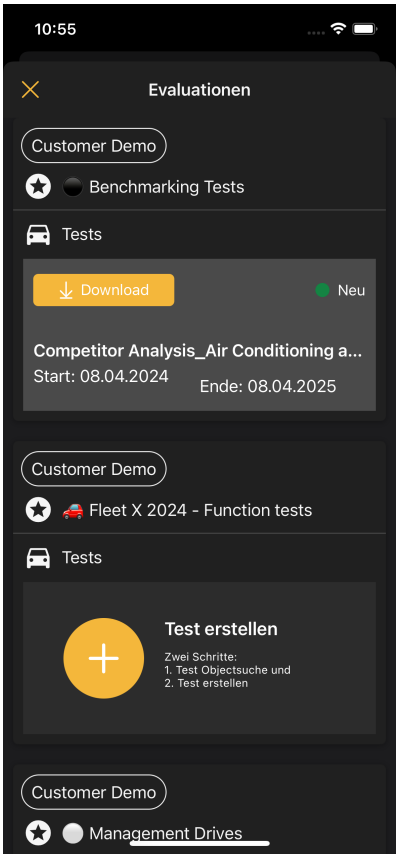

The process of accessing the iOS app has now been simplified. By scanning the **QR code** on the homepage of the Control Center, users (who already have the IVA iOS app installed) are directed to a login screen.

There is also a second way to access the app directly. If you have an iOS device at hand and are browsing the internet using Safari, Firefox, Google Chrome, or another browser, you can simply click on the **"Open in iOS App"** button to open the IVA app.

After entering the required credentials on the login screen, the IVA app will open, displaying all assigned tests.
