

2.0 Change of instance

Overview of the instances

A quick instance change has been made possible in the app. This means that a user can be logged in to multiple instances. If the login was successful in the app, a new login is no longer necessary.

Changes to the burger menu

A new menu item "Change instance" has been added to the burger menu.

In addition, the name of the instance is located above the user name.

Detailed description is here: [LINK to the manual](#).
