- Fixed bugs

# Additional buttons in Reports

The screenshot shows a web application interface for feedback validation. The breadcrumb navigation is: Evaluations > Test Status Entwurf vs. Freigegeben > Entwurf vs. Freigegeben 2 > Feedback validation. The user is logged in as Max Muster. In the top right corner, there are three buttons: 'Reload', 'Create report', and 'Simple report'. The 'Create report' and 'Simple report' buttons are highlighted with a red box. The main content area shows a search list for 'Entwurf vs. Freigegeben 2' with a 'Hide matrix' button and a '+ Create feedback' button. Below this, there is a table of feedback entries. The table has columns for Validated, Time, Tester, Category, and Rating. There are two entries in the table, both with a rating of 8. A 'Show key values' button is located to the right of the table. The Teamware logo is visible in the bottom left corner.

Validated	Time	Tester	Category	Rating
<input type="checkbox"/>	09/07/2022 11:20 am	Virginia Muecke	Allgemein	8
<input type="checkbox"/>	05/23/2022 04:28 pm	Virginia Muecke	Allgemein	8

In the feedback validation there is an additional button "Simple report" that takes you back to the previous screen. In addition, there is now a "Create report" button with which you can create a CSV or PDF file directly.

Fahrzeuge / Test	Description	Rating	Tester	Status	Validated	Actions
Entwurf vs. Freigegeben 2	Lorem Ipsum	8 / 10	Max Muster - Freigegeben 09/07/2022 11:20 am	Draft		
Entwurf vs. Freigegeben 2	Lorem Ipsum	8 / 10	Max Muster - Freigegeben 05/23/2022 04:28 pm	Completed		

Teamware

In the advanced reports, there is now also the "Simple report" button, with which you can return to the previous screen.

# Fixed bugs

FIRE-1111 Remove test object from test and add it back

- Bug: If you remove a test object from a test and add it to the test from the evaluation or the data pool, the current, new and changed attributes are not adopted. This also applies to the documents and the image on the test object.
- Solution: If a test object is added to a test, even if it was removed from the test shortly before, all current, new or changed attributes as well as documents and images are added. If a test object is changed in the data pool, the changes are now included in the test if the test object is removed and re-imported into the test.
