# 1.0 Dynamic Excel reports

## Excel report templates

with

A new functionality includes the creation of dynamic Excel report templates in Feedback. The templates include a link between the Excel file and the IVA. They enable automatic checking between Excel template and IVA data while facilitating targeted evaluation.

You can edit, overwrite, delete, and download them.

# 2.0 Communication with tester (part 2)

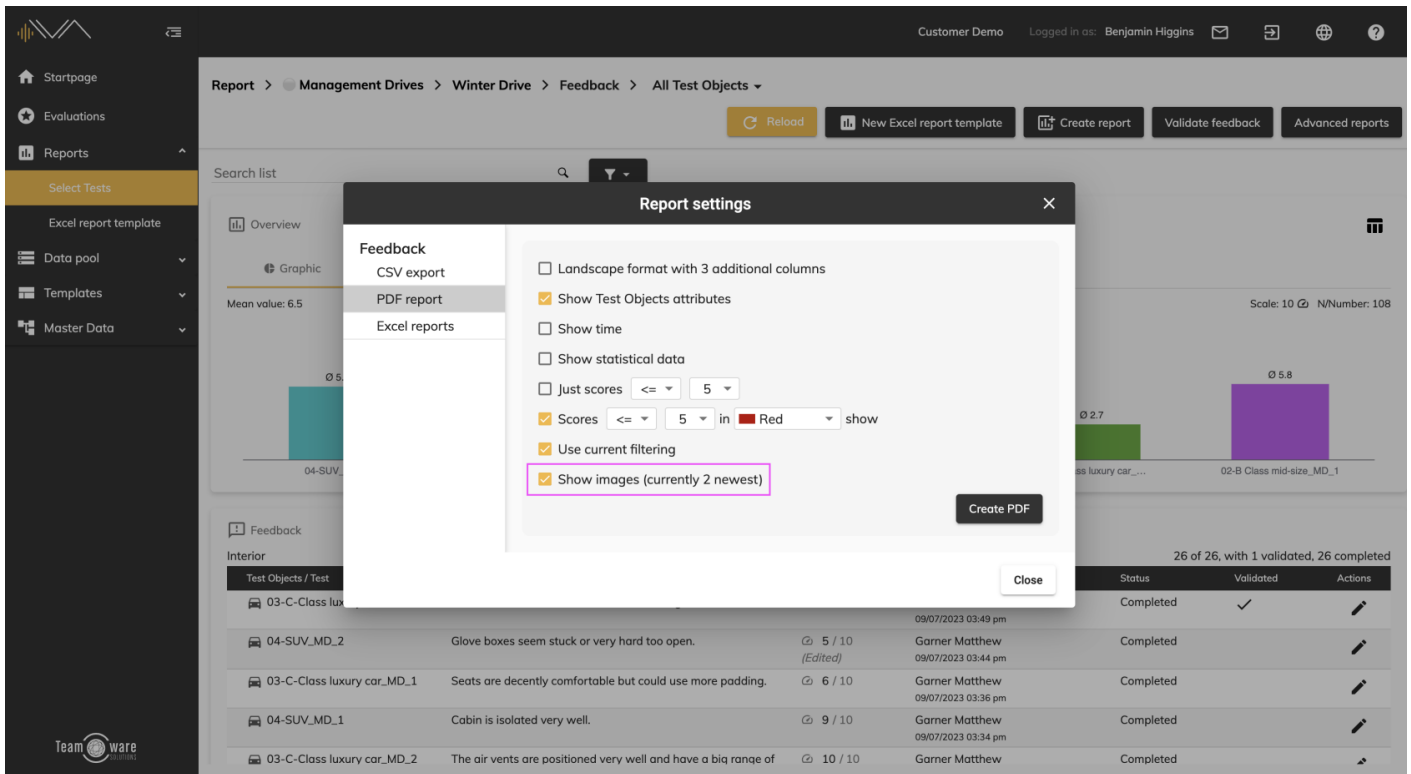

The screenshot displays the 'Feedback validation' interface in the Teamware application. The breadcrumb trail at the top reads: Evaluations > Fleet Management > Drive - IN 6290 / Garner Matthew > Feedback validation. The interface includes a sidebar with navigation options: Startpage, Evaluations, Reports, Select Tests (highlighted), Excel report template, Data pool, Templates, and Master Data. The main content area shows a table of feedback entries. The first entry is highlighted, showing a comment from Benjamin Higgins and a response from Matthew Garner. A red box highlights the 'Forward comment to tester' checkbox and the 'Confidential' toggle. A red arrow points to the 'Forward comment to tester' checkbox.

Validated	Time	Tester	Category	Rating
<input type="checkbox"/>	10/09/2023 10:07 am	Matthew Garner	Transmission	3
<input type="checkbox"/>	10/09/2023 10:06 am	Matthew Garner	Transmission	6
<input type="checkbox"/>	10/09/2023 10:04 am	Matthew Garner	Interior	7

There are several ways to protect feedback comments (keep them confidential) or to continue a brief communication with the tester. This function can only be used when the feedback is completed. Communication takes place in the IVA planner (web application) and in the app.

Detailed description is here: [LINK to the manual](#)

# 3.0 Report of a PDF file with images

PDF reports are now visually supported in the report settings under Feedback. A maximum of two images can be displayed in a PDF file.

# Bugs

The language change is easier and updated immediately.

The manual time in the newly created feedback is saved.

The handling of the columns in the feedback has been improved.
