

# Version 2.6.1-2024

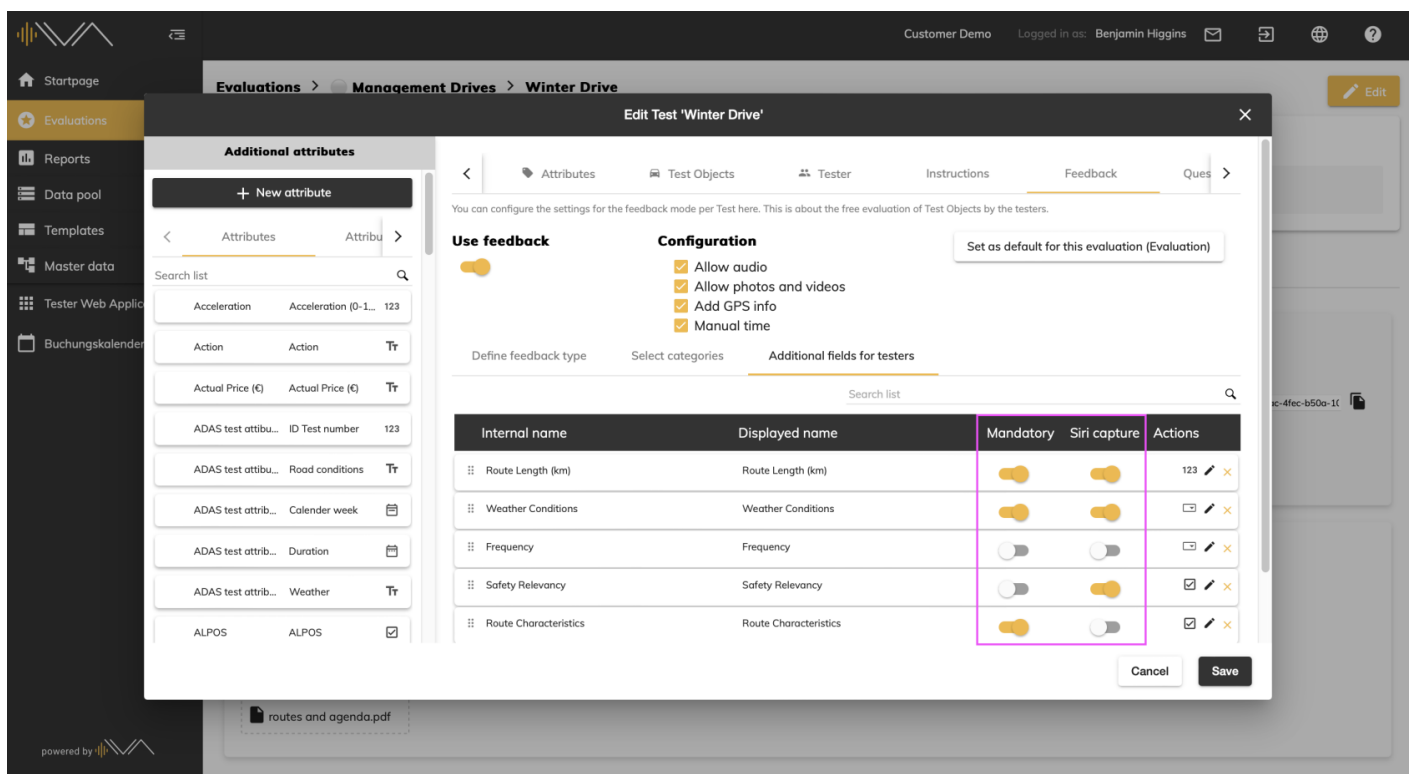

A release that includes some optimizations and new functionalities, e.g: Mandatory additional fields for increased tester performance. Some BUGs have been fixed to optimize stability. The update to this version is automatic

- 1.0 Additional fields for testers as mandatory fields
- 2.0 Performance improvement in the evaluation
- 3.0 BUGs

# 1.0 Additional fields for testers as mandatory fields

It is now possible to mark the additional fields as mandatory fields. When creating or editing a test, you can set two additional toggles in the feedback under "Additional fields for testers":

- Mandatory field, for the tester UI and the iOS app
- Siri query, only for the iOS app

The mandatory field must be answered so that the feedback can be saved. The feedback cannot be completed without filling in the mandatory field first.

If the toggle for "Siri capture" is switched on, Siri explicitly asks the tester about the selected field in the feedback.

In the Web Tester it looks like this: [Link to the manual](#)

In the iOS app it looks like this: [Link to the manual](#)

# 2.0 Performance improvement in the evaluation

Performance has been optimized for the feedback overview, both in the analysis and in the validation. The loading speed has therefore been improved.

# 3.0 BUGs

## Appearance of the Net Promoter Score

In future, the Net Promoter Score will also be displayed correctly with a longer description. The individual fields containing the rating can now have different widths depending on their descriptive text.

The screenshot shows the 'Function Test\_Charging' configuration page in the 'Technical Development' section. The page is titled 'Function Test\_Charging' and shows a 'Status of Test' as 'Stopped'. The 'Change status to' buttons include 'Publish', 'Stopped', 'Meeting break', and 'Complete'. The 'Start' date is 08/14/2023 and the 'End' date is 08/14/2023. The 'Feedback' tab is selected, showing a 'Feedback type' section with a rating scale from 1 to 10. The scale is divided into four categories: Unacceptable (1-3), Critical (4-5), Improvable (6-7), and Commendable (8-10). The 'Feedback configuration' section on the right includes checkboxes for 'Allow audio', 'Allow photos and videos', 'Add GPS info', and 'Manual time'. The 'Assignment category-Test Object' section shows a list of categories: Powertrain, General, Start & Stop, Power Development, and Gear Shift. The 'Powertrain' category is selected, showing subcategories: General, Start & Stop, Power Development, and Gear Shift. The 'Power Development' subcategory is marked as 'Archived'.
