

Version 2.7-2024

- 1.0 The entry point to the iOS app
- 2.0 New Filter in the Reports select Tests
- 3.0 Category Path and Tooltip in Feedback Graphic and Table
- 4.0 BUGs

1.0 The entry point to the iOS app

The entry point to the iOS app has been integrated into the Control Center. On the personalized home page, you will now see the following three tiles:

- **Connect iOS App**
- **Online Manual**
- **Support**

In the "**Connect iOS App**" tile, you will find a QR code and a button. Both actions are intended exclusively for iOS devices. If the IVA app is installed on the iOS device, scanning the QR code will lead you to a login screen. After logging in, the tester will see all the assigned tests.

If you have an iOS device at hand and are using a browser (Safari, Firefox, or Google Chrome, etc.), you can also open the IVA app by clicking the "Open in iOS App" button. Once the required credentials are entered on the login screen, the IVA app will open.

In the "**Support**" tile, you will find a phone number and an email address that you can contact for questions or issues.

Clicking the "**Online Manual**" tile will take you to the manual overview. There are various sections, also referred to as shelves, which are available in two languages: German and English. You can search for a term using the search function or navigate by clicking on the respective shelf. The following shelves are available:

In the "**Support**" tile, a phone number and an email address are provided, which you can contact for questions or issues.

2.0 New Filter in the Reports select Tests

In the **Reports** menu and the "**Select Tests**" submenu, a new filter function has been introduced to simplify selection. From now on, you can sort by the following 7 criteria:

- **Start**
- **End**
- **Results for instructions available**
- **Results for feedback available**
- **Results for questionnaires catalogs available**
- **Questionnaires / Questionnaires series, even with no answer sets = 0**
- **Show archived**

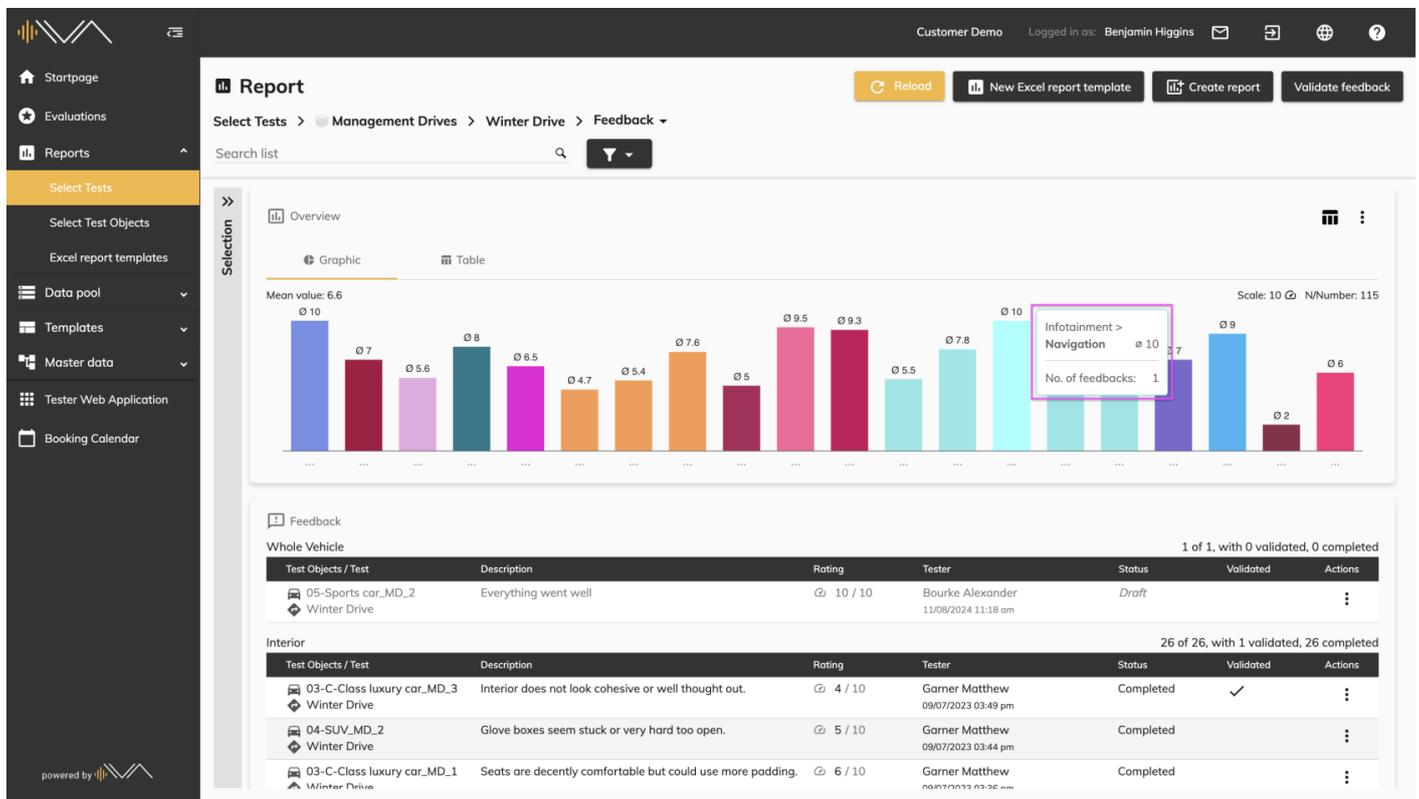

At the end, you can click "**Reset to default**" to clear all filters.

The screenshot displays the 'Report' interface with a sidebar on the left containing navigation options: Startpage, Evaluations, Reports (selected), Select Tests (highlighted), Select Test Objects, Excel report templates, Data pool, Templates, Master data, Tester Web Application, and Booking Calendar. The main content area shows a list of reports under the 'Report' header. A search bar is at the top of the list. A filter dropdown menu is open, showing the following options: Start, End, Results available for instructions, Feedbacks available, Results available for questionnaires, Questionnaires / Questionnaire series, and Show archived. A 'Reset to default' option is at the bottom of the dropdown. The report list includes columns for Test objects, Instructions, Feedback, and Questionnaires, along with status and date information.

Report Name	Status	Start Date	End Date	Test objects	Instructions	Feedback	Questionnaires
Fleet Management 01/01/23 - 12/31/23							
Drive - IN 4943 / Bourke Alexander	Published			1	0	4	0
Drive - IN 6290 / Garner Matthew	Published			1	0	5	0
Drive - IN 7483 / Bourke Alexander	Published			1	0	9	0
Drive - IN 9732 / Lees Jodie	Published	03/01/23	03/31/23	1	0	11	0

Winter Drive	Published	02/05/24	02/18/24	7	0	115	0

3.0 Category Path and Tooltip in Feedback Graphic and Table

A tooltip has now been introduced in the **"Reports" and "Select Tests" > "Analysis"** section for both the graphic and the table. When hovering over a category bar in the graphic with the cursor, the tooltip displays the associated categories or subcategories as well as the feedback count.

The same behavior can also be observed in the table.

4.0 BUGs

The chassis number is displayed correctly.

In "Reports" and "Validate feedback," when the "matrix" toggle is enabled, the complete key value is now displayed.

The screenshot shows a web application interface for generating reports. The top navigation bar includes 'Customer Demo', 'Logged in as: Benjamin Higgins', and utility icons. The main content area is titled 'Report' and shows a breadcrumb trail: 'Select Tests > Management Drives > Winter Drive > Feedback'. A search bar and a 'matrix' toggle are visible. Below the toggle, a table lists test objects with columns for 'Safety R/Route Characteristics', 'Parking assistance', 'Calendar Week', 'Priority', and 'Safety-re'. A 'Show key values' button is also present. A purple box highlights a list of chassis numbers: '02-B-Class mid-size_MID_1', '03-C-Class luxury car_MID_1', '03-C-Class luxury car_MID_2', '04-SUV_MID_1', and '05-Sports car_MID_2'. The bottom left corner features the logo 'powered by' followed by a stylized 'W' logo.
