

# 1.0 Table improvements in the overview of test objects

You can now see a new table be displayed in the data pool under test objects.

The test objects now have three fixed attribute columns in the left-hand area. In the right-hand area, there are further attribute columns of the test objects arranged alphabetically. Each column represents an attribute that is assigned to one or more test objects.

The following three columns are located in the left-hand area:

- **Name**
- **Key number**
- **Actions**, with edit and copy function

The screenshot shows a web application interface with a sidebar on the left and a main content area. The sidebar contains navigation links: Startpage, Evaluations, Reports, Data pool, Test Objects (highlighted), Questions, Instructions, Templates, Master data, Administration, Tester Web Application, and Buchungskalender. The main content area is titled 'Test Objects' and features a search bar, a filter dropdown set to 'Max Power (PS): >= 120', and buttons for 'CSV import' and 'Create Test Object'. Below this is a table with 10 columns: Name, Key value, Actions, Image, Attachments, AdHoc-Tests, Acceleration (0-100...), Boot Volume (Litres), and Chassis Type. The table contains 10 rows of test object data, including sports cars, SUVs, and sedans. The bottom left corner of the interface says 'powered by' followed by a logo.

									(Total: 34)
Name	Key value	Actions	Image	Attachments	AdHoc-Tests	Acceleration (0-100...	Boot Volume (Litres)	Chassis Type	
05-Sports car_MD_2	6513 3792	 		1 		2		Coupé	
05-Sports car_MD_3	6513 1652	 				3		Coupé	
05-Sports car_MD_2	6513 1654	 				3.4		Coupé	
05-Sports car_MD_1	6513 1656	 				3.7		Coupé	
06-Jeep_TD_1	1326 565362	 				5.4		SUV	
03-C-Class luxury c...	154 6564	 				5.6		Sedan	
03-C-Class luxury c...	154 6566	 				5.8		Sedan	
03-C-Class luxury c...	154 6565	 				5.8		Sedan	
04-SUV_BM_1	185 6562	 		2 		5.9		SUV	

Additional columns can be added to the left-hand area, which are then excluded from horizontal scrolling.

By manually moving the columns in the table header, it is possible to flexibly define the order and width of the columns. This manual sorting is reset after switching to another menu item or refreshing.
