

# 3.0 BUGs

## Appearance of the Net Promoter Score

In future, the Net Promoter Score will also be displayed correctly with a longer description. The individual fields containing the rating can now have different widths depending on their descriptive text.

The screenshot shows the 'Function Test\_Charging' configuration page in the Tester Web Application. The interface includes a sidebar with navigation options like 'Startpage', 'Evaluations', 'Reports', 'Data pool', 'Templates', 'Master data', 'Tester Web Application', and 'Buchungskalender'. The main content area displays the 'Function Test\_Charging' configuration, including a 'Status of Test' (Stopped), 'Change status to' buttons (Publish, Stopped, Meeting break, Complete), and a 'Feedback type' section. The 'Feedback type' section is highlighted with a pink box and shows a scale from 1 to 10, categorized into 'Unacceptable', 'Critical', 'Improvable', and 'Commendable'. The 'Feedback configuration' section on the right includes checkboxes for 'Allow audio', 'Allow photos and videos', 'Add GPS info', and 'Manual time'. Below the feedback configuration, there is a section for 'The following categories are available in the app' with a list of categories: Powertrain, General, Start & Stop, Power Development, and Gear Shift.
