

7.0 Deactivate test object

The screenshot shows the 'Edit Test' interface for 'Competitor Analysis Comfort'. The 'Test Objects' tab is active, displaying a list of test objects. A purple box highlights a toggle switch in the 'Actions' column for the test object '04-SUV_BM_2', which is currently turned on (yellow). The interface also shows a search list on the left and a 'Save' button at the bottom right.

A new function has been introduced: “Deactivate test object”, which can be implemented using a toggle. A test object that is no longer available for various reasons can thus be excluded from future feedback in a test.

A test object can be deleted in the test if no results are available for it.

If results are available for a test object, it can only be archived in the data pool.

Revision #4
