

Feedback validation - Displaying affected vehicles

The screenshot shows a web application interface for feedback validation. The left sidebar contains navigation links: Startseite, Evaluation, Auswertung (highlighted), Datenpool, Vorlagen, Stammdaten, and Administration. The main content area is titled 'Auswertung > Evaluation > Test > Feedback-Validierung'. It includes a search bar, a 'Matrix ausblenden' button, and a '+ Spalte hinzufügen' button. A red box highlights the text 'Betroffene Fahrzeuge: 3 von 3'. Below this, a table displays feedback entries. The table has columns: Validiert, Zeitpunkt, Manueller Zeitpunkt, Tester, Kategorie, Bewertung, Datum-Bsp, and Auswahl-Bsp. The first entry is for 'Klima' with a rating of 10/10. The second entry is for 'Sitze' with a rating of 2/10. The third entry is for 'Ergonomie' with a rating of 1/10. To the right of the table, there are three vehicle models: Audi e-tron advance, BMW 840i Coupé, and BMW 840i Coupé. A toggle switch for 'Schlüsselwerte einblenden' is also visible.

Validiert	Zeitpunkt	Manueller Zeitpunkt	Tester	Kategorie	Bewertung	Datum-Bsp	Auswahl-Bsp
<input checked="" type="checkbox"/>	15.02.20 15:02	16.02.20 01:02		Klima	10/10	11.03.2021	Auswahl 1
<input type="checkbox"/>	15.02.20 14:02			Sitze	2/10		
<input type="checkbox"/>	15.02.20 15:32			Ergonomie	1/10		

You are given a clear display of the tester's feedback and can immediately identify which and how many vehicles are affected by it.
