Version 2.6-2024

Tester Version 1.14.0-362

1.0 Additional fields for testers

The planner has the option of defining additional fields that are available to the tester in the web app for a more detailed description of the feedback.

These fields (attributes) are displayed when creating and editing feedback and can be assigned a value by the tester via the corresponding input field.

Renamed "Comment" to "Description"

Comments in Feedback have been renamed to "description".

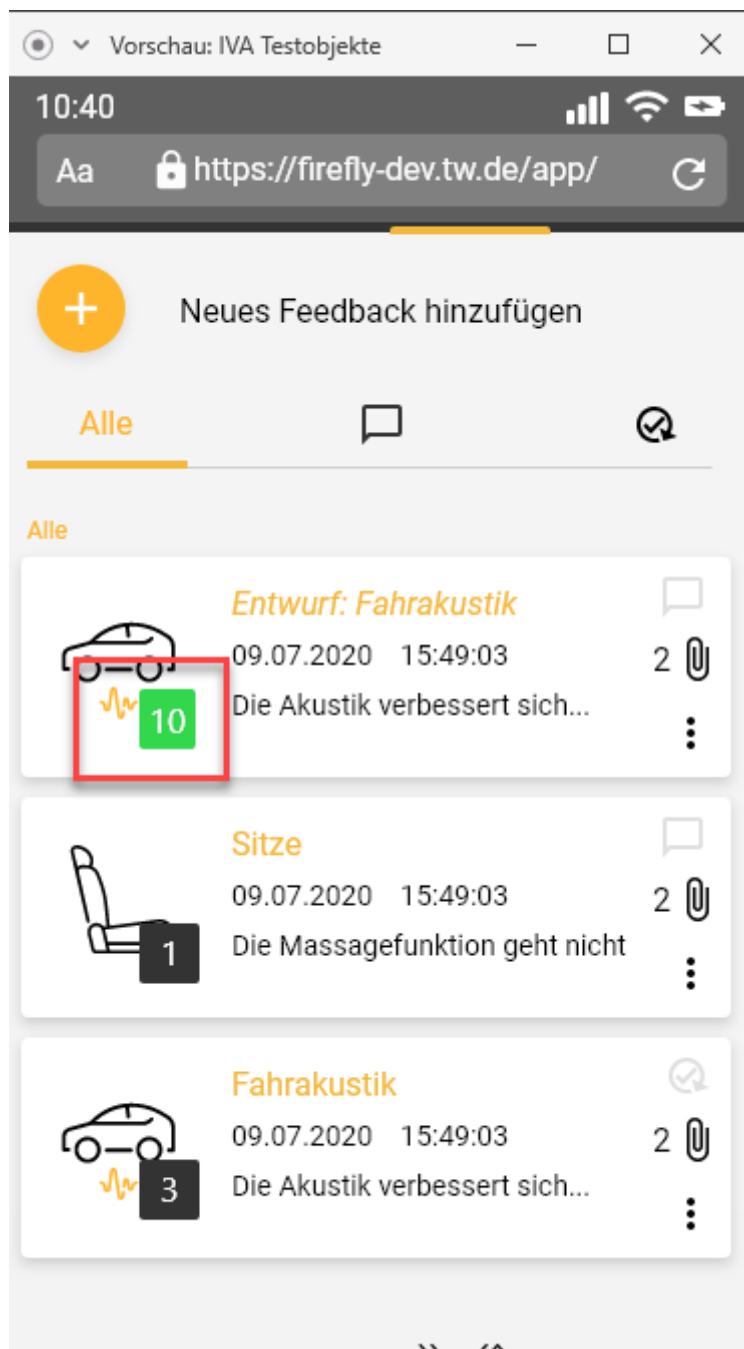

Fixed Bugs

FIRE-901 Assignment of a new password

- Bug: If you have forgotten your password, an empty page appears after assigning a new password.
- Solution: After assigning a new password, you will be forwarded directly to the test overview.

Version 1.10-2022

Rating in the feedback overview

In the feedback overview of the mobile web application, you can directly see the rating you've given for a feedback.
