

Create feedback

The screenshot shows a web application interface for creating feedback. The background is an aerial view of a road winding through a dense forest. A dark overlay at the top contains a logo on the left, the text "Cognitive Walkthrough IVA Webanwendung" in the center, and a user profile icon labeled "AH" on the right. A white "Add feedback" dialog box is centered on the screen. The dialog has a "Cancel" button in the top left corner and a "Save" button in the top right corner. Inside the dialog, there is a text input field labeled "Description". Below the input field is a five-star rating system. Underneath the stars are three category buttons: "Allgemein" (General), "Demografie" (Demographics), and "Usability". At the bottom of the dialog is a dashed box containing a file icon and the text "Attach photo, video or audio file".

In the overview you can see the feedback you have already created. You can edit your feedback by clicking on the entry or add a new one using the "+" button. To do this, give your feedback in the "comment" field, rate the complaint and select a suitable category. Photo, video or audio files can be attached in the lower area. Just click on the tile and select from your computer. You can add a GPS position or a time or choose another reviewer via "+ extras".
