How do I create a new answer option?

The screenshot shows the 'Create answer option' dialog box in the Teamware application. The dialog is titled 'Create answer option' and has a close button (X) in the top right corner. It features a 'Name' field (mandatory, indicated by an asterisk) and a 'Description' field. On the left side, there is a 'Select question type' section with a list of options: Multiple choice, Radio button, Radio button matrix, Checkbox, Checkbox matrix, Dropdown, Text, Short answer, Paragraph, Scale, Emotions, Star rating, Net Promoter Score (Rating), Location input, and GPS position input. The 'Text' option is currently selected. The main area of the dialog is a large text box with the placeholder text 'Select a question type from the list on the left.' At the bottom right, there are 'Cancel' and 'Save' buttons. The background shows the Teamware interface with a sidebar containing 'Startpage', 'Evaluations', 'Reports', 'Data pool', 'Templates', 'Questionnaires', 'Instruction sets', 'Attribute sets', 'Category sets', 'Answer options', 'Master Data', and 'Administration'. The 'Answer options' menu item is highlighted. The top right of the interface shows 'Standard' and 'Logged in as: Max Muster'.

To create a new answer option, first navigate to the corresponding menu item. To do so, click on Templates -> Answer Options in the left navigation bar. There you will see an overview with all your existing answer options. To add a new one, click on the "Create answer option" button in the upper right corner. Now a new popup appears where you can give the set a name (attention: mandatory field) and optionally add a description. In the left column you can see an overview with all available question types. When you have decided on a question type, simply click on the corresponding line. The selected question type is now waiting for your configuration in the big box. When you are done, don't forget to press the "Save" button.

How do I edit an existing answer option?

The screenshot displays the 'Answer options' management interface. On the left, a sidebar lists various system components, with 'Answer options' highlighted. The main area is titled 'Answer options' and contains a 'Create answer option' button. Below this, a 'Select question type' panel shows 'Radio button' as the selected option. The 'Answer option details' panel on the right allows editing of the selected option. It includes a 'Name' field (currently 'Ja-Nein'), a 'Description' field, and a 'Radio button' configuration section. This section has an 'Enter option' text box, a list of options (currently 'Ja' and 'Nein' with color-coded indicators), and a '+ Add 'Other'' button. At the bottom of the details panel are 'Delete', 'Cancel', and 'Save' buttons. The top right of the interface shows the user is logged in as 'Max Muster'.

To edit an existing answer option, you must first navigate to the corresponding page. To do this, click on "Templates" -> "Answer Options" in the left navigation bar. Select your desired answer option there (tip: you can also use the search) and double-click on the corresponding line or alternatively on the pencil icon. Now a popup will open where you can see all available question types in the small column and the details of your answer option in the large area. There you can edit the name, description as well as the configuration of the current question type. When you are done editing, don't forget to click the Save button.

Importing answer options from another division

To import answer options from another division into your division, first navigate to “Templates” -> “Answer options”.

Here, click on the “Import from other division” button. A pop-up will then open with the divisions from which you can import answer options. Select a division and then click on Import to import the relevant answer options.
