Activating the "Tester can change reviewer" feature

To activate the "Tester can change reviewer" feature, you must first navigate to the corresponding page. To do this, click on "Templates" -> "Answer Options" in the left navigation bar. Activate the checkbox for "Tester can change reviewer" in a test or evaluation if you want to use this function.

This makes it possible for testers to select another tester from a list and assign free feedback to them, without them having to be logged in themselves. This is useful, for example, if several testers share an iPhone/iPad for joint assessment.
